MADE IN THE USA!

Introducing the All New MiniStar10

- **EXTREMELY INTENSE LIGHT** output comes from TerraLUX' use of the world's brightest LEDs available. When you buy TerraLUX products, you know your getting the best and the brightest that is technically possible! TerraLUX combines the brightest LEDs with world-class power management circuitry. The new MiniStar10 contains advanced electronics that provides emergency level light even with batteries that would generate no light at all with the standard halogen or xenon bulb!
- **NEVER BURNS OUT.** With a rated 100,000 hr life you should never need to replace a bulb again! No more delicate, expensive bulb to handle.
- **LONGER BATTERY LIFE** results from the *PowerPush circuit* built into the unit which completely utilizes the power from the batteries, while maintaining constant light output. Expect a 4 hour runtime instead of 1 hr.
- **SAVE MONEY!** Rechargeable batteries must be replaced after about 300-1000 cycles. The longer run time means fewer charging cycles and more money in your pocket. **PAYS FOR ITSELF IN BULBS AND BATTERIES.**
